

ULTRA DISPLAY ROW

INSTALLATION GUIDE: 3FT, 4FT

RECOMMENDED TOOLS: Tape measure, Level, Pencil, Electrical drill, and Stud finder, 1/2" Drill bit

PACKAGE CONTENTS

QTY	Description
1	Display Rack
6	Toggle Bolts
6	Wood Screws
6	Screw Caps

INSTALLATION STEPS

IMPORTANT: Before installing, check package contents for missing or damaged items.

STEP 1: FIND DESIRED LOCATION

Use stud finder to assist in mapping out mounting locations. Place display row against wall in desired location.

STEP 2: MARK MOUNTING HOLES

Ensure the rack is straight by placing a level on the rack. Use a pencil to mark mounting holes and set the rack aside.

STEP 3: DRILL MOUNTING HOLES

If there is sheet rock, drill holes at all marking places using 1/2" drill bit. If plywood or studs are behind the sheetrock, no pre-drill is necessary.

STEP 4: ASSEMBLE HARDWARE ONTO DISPLAY ROW

If using toggle bolts, assemble hardware onto display row through the holes that are provided.

STEP 5: ALIGN HARDWARE TO HOLES AND SECURE

Align the toggle bolts to the pre-drilled mounting holes and push the toggle bolts through the holes. Secure the display row by using a drill to tighten the hardware on the top right side of the display row. If plywood or studs are behind the sheetrock, tighten the screws with a drill directly into the wall.

PRO TIP: Tighten the screw only on the top right corner to make the rack easier to level.

STEP 6: SECURE REMAINING HARDWARE

Ensure the rack is straight by placing a level on the rack. Tighten the top left screw and follow by tightening remaining screws.

PRO TIP: Use a 4' level to yield the best results.

STEP 7: ADD WINE BOTTLES & ENJOY!
